Green has become a trend in recent years, both with the popularity of the Monster Energy paint scheme as well as the release of the new Traxxas Monster Jam replica line up of Stampede trucks that include the Grave Digger[®] body with green chassis components. To help customize any green theme, **RPM** is proud to release several new green components that have been color-matched to the stock green chassis components on the Traxxas Grave Digger[®] truck. These five new parts fit the Traxxas Monster Jam replica line-up of Stampede trucks as well as several other Traxxas vehicles.

RPM green products are molded from our trademark blend of superior nylons and are backed by our industry-leading limited lifetime breakage warranty. Not only are they great looking, like all **RPM** parts, they're tough!
