PRESS RELEASE

## Traxxas XO-1: The World's Fastest Ready-To-Race Radio Control Car

# 1000+MPH

EXPERTS ONLY

THE **WORLD'S FASTEST**  
READY-TO-RACE<sup>®</sup> **SUPERCAR**

# XO-1

**All Wheel Drive • Big-Block Brushless Power • Advanced Aerodynamics**

Traxxas<sup>®</sup> is The Fastest Name in Radio Control<sup>®</sup>. For over 25 years, we have made it our mission to innovate. To lead. To find the next level of performance and capability. We are driven by a passion for speed and power, and now Traxxas has redefined the meaning of both. State-of-the-art technology. Cutting edge design. A total focus on quality and precision. All have been distilled into one vehicle that could only come from Traxxas. 0-60 in 2.3 seconds. 0-100 in 4.92 seconds. Top speed over 100MPH! Simply put, XO-1 is the world's fastest Ready-To-Race Supercar.

The heart of the XO-1 is its power system. The unique speed control and 'Big Block' motor combination is based on the proven Castle Creations Mamba Monster. From its integrated capacitor bank to the proprietary software created just for XO-1, the Mamba Monster Extreme ESC represents the ultimate in big-volt power delivery. The Big Block motor features a finned, heat-dissipating can, premium-quality ABEC-1 bearings, sintered Neodymium magnets, and superior electromagnetic design for massive acceleration and true supercar performance with the largest brushless motor ever offered in a Ready-To-Race model.

XO-1 unleashes its brutal brushless power through all four tires via a shaft-driven All Wheel Drive system equipped with the patent-

pending Cush Drive<sup>™</sup> system. A custom-shaped elastomer damper between the spur gear and the drive hub absorbs drivetrain shocks. The result is instant acceleration with no wasted power. New splined-steel driveshafts transfer power to 17mm aluminum hex hubs and spin on oversized 6X12mm bearings. Every component is designed to marshal XO-1's incredible power into relentless acceleration and breathtaking velocity.

At speed, XO-1's advanced aerodynamics press it to the track with downforce generated by the front splitter, channeled chassis extensions, functional diffuser, and aggressive rear wing. Only Traxxas has incorporated the proven air-management systems of road racing cars into an ultra-high performance radio control model.

With such incredible speed and power comes a responsibility for precision control, and XO-1 delivers with the TQi and Docking Base, a breakthrough innovation that turns your iPhone<sup>®</sup> or iPod touch<sup>®</sup> into a powerful tuning tool. The full-color display combines with the Traxxas Link<sup>™</sup> App to deliver an intuitive, high-definition, graphical user interface that makes it simple to optimize your radio system for ultimate vehicle control.

**NEW**  
TQi Transmitter With Docking Base<sup>™</sup>

# 100+MPH X0-1

## X0-1 Features

- 50+mph out of the box, 100+ with optional, included accessories
- Mamba Monster Extreme electronic speed control with integrated capacitor bank
- Exclusive Traxxas®/Castle Creations® Big Block 1717 brushless motor
- Functional aerodynamics package with standard and high downforce splitters, chassis extensions, and diffuser
- TQi 2.4GHz High-Output radio system with Traxxas Link Model Memory and factory installed TQi Docking Base
- Splined Steel (SS) driveshafts with dual CV joints
- Oversized 6mm stub axles.
- Exclusive Traxxas Cush Drive™ system absorbs drivetrain shocks
- Hard-anodized aluminum Teflon®-coated GTR shocks with titanium-nitride shafts
- Road-tuned 1.6 N/mm (9.1 lb/in) rate springs
- Specially engineered, speed-rated belted slick tires (118+mph)
- Black-chrome Split-Spoke wheels
- Includes two 3-cell 5000mAh Power Cell LiPo battery packs
- Integrated telemetry sensors relay speed, RPM, voltage, and temperature data to the TQi transmitter
- Waterproof, o-ring sealed receiver box with integrated servo mount
- Scalable battery compartments
- Dual-bellcrank steering with integrated servo saver

## Includes Two Power Cell 3S 5000 mAh LiPo Batteries

## Available in Four Metallic Colors

# **NEW** **TQi** 2.4GHz Radio System *Compatible with iPhone and iPod touch*

## TOP QUALIFIER

Traxxas is proud to introduce the world's most advanced Ready-To-Race® radio system. Precise, comfortable, powerful, and reliable, the all-new Traxxas® TQi™ radio system arrives with a full complement of tuning features; long-range, high-output, 2.4GHz signal, and proven Traxxas reliability for rock-solid performance. It's so advanced, it doesn't even need an external antenna. However, the most important new feature may already be in your pocket.

The TQi can be equipped with the optional Docking Base that turns your iPhone® or iPod touch® into a powerful tuning tool for your Traxxas model. The full-color display combines with the Traxxas Link™ App to deliver an intuitive, high-definition, full-color graphical user interface that unlocks the mysteries of optimizing your radio system for ultimate vehicle control. This powerful app gives you complete control over the operation and tuning of your Traxxas model with stunning visuals and absolute precision. Install Traxxas Link telemetry sensors on the model, and Traxxas Link displays real-time data such as speed, RPM, temperature, and battery voltage with brilliant graphics. Traxxas builds the world's fastest Ready-To-Race radio-controlled models capable of 100+mph. Traxxas Link gives you the tools for exacting adjustment and superior control while always keeping you informed on your model's status and speed.

## **Customizable Display With Real-Time Telemetry**

**Compatible with iPhone and iPod touch**
