PRESS RELEASE

Traxxas Power Cell LiPo 4200 & 5000mAh 2S Packs

Traxxas' new 4200mAh and 5000mAh Power Cell LiPo packs are ideal for all Slash and Slash 4X4 models, E-Maxx Brushless Edition, and E-Revo Brushless Edition. The 5000mAh pack is also recommended for Spartan. Power Cell LiPo packs are engineered to give the punch and on-demand power to reach the top speeds Traxxas models are built to achieve. Premium LiPo cells developed specifically for Traxxas feature oversized discharge tabs for maximum efficiency. The cells are hard-wired with 12-gauge Maxx® Cable, eliminating the resistance and power-loss associated with plug-in wires. The standard XH plug permits balance charging with the #2933 EZ-Peak Plus LiPo/NiMH charger, and the Traxxas High-Current Connector assures total power transfer for higher speeds, longer run time, and more fun from every charge. The packs' semi-rigid construction results in a firm, rugged, and compact pack that does not require a hard case, and the center-wire configuration assures a pinch-free fit in Traxxas vehicles.

Lifetime Battery Exchange Program

Traxxas stands by Power Cell LiPo batteries with the best warranty and exchange program available. For the first year of ownership, Traxxas will replace any battery found to be defective at no cost. After one year, any Power Cell LiPo battery in any condition can be exchanged for a new equivalent battery for just 50% of the new pack's list price, no questions asked.

Power Cell 4200 & 5000mAh LiPo Features
